

### **Lt Col Yelyzaveta Boiko - UA MOD**

Lt Col Yelyzaveta Boiko is the Head of the Department for Application Software Development and Innovation in Information Technologies at the Center of Innovations and Defence Technologies Development, UA MOD. Since the project began in 2016, she has worked as a Senior Frontend Developer for DELTA, the Ukrainian combat ecosystem. Serves in the Army since 2012 and observes all shifts of military paradigms during the Russian war in Ukraine.

For the past few years, Yelyzaveta has led the technical team in testing the DELTA combat system's interoperability with partners during NATO CWIX exercises
